FEATURES

STEEL DECK (CORE-10)

The preferred option on larger capacity trailers due to its strength and durability. Core-10 steel decking is now standard on all trailer models.

REMOTE AXLE GREASING (OPTIONAL EXTRA)

An easy and effective way to improve machine maintenance, remote axle-greasing saves time giving you access to all axle greasing points in one easy to reach location.

DROP-DOWN TRAILER SIDES

A new feature across all trailers, drop-down sides allow easy access to the deck for side loading.

MULTI-STAGE RAM

Four and five stage RAM's are used across our larger trailer models, providing steeper tipping and more lifting power.

OVERVIEW

Rugged, reliable and built to last. Coombridge & Alexander have developed SAM Hydraulic Trailers from over 70 years' experience manufacturing agricultural machinery for New Zealand conditions. Our range of SAM Hydraulic Trailers are renowned for their superior construction and strength. Choose a SAM for:

- Excellent reliability and solid construction
- Ease of operation and convenience
- Shot-blasted, primed and two-pot paint finish coated chassis
- Designed and manufactured in New Zealand

Our range of SAM Fertiliser Spreaders, Feed Wagons and Hydraulic Trailers are backed-up by a fast and comprehensive spare-parts support service from our Hamilton location.

Our team are also available for diagnostic support, as well as technical and sales information.
